MENTAL HEALTH BOT

Allow for individual and isolated use for privacy

Let's users feel free to share their thoughts and ideas

Strengthens the relationship and possible connections with the user.
(Vision)

Customizable AI character that the user can interact with

Speech to text and text to speech interactions

MENTAL HEALTH QUESTIONS

Ask the Bot whatever you would like. (e.g. What are places to eat on campus)

Sample response: "Possible places to eat on campus are Chick fil-a, Subway, and Panda Express."

Other inquiries that could be asked. (e.g. I'm feeling down and tired what should i do?)

Sample response: "You could possibly take a quick nap to boost your energy for the day!"

Many different types of questions can be asked, and all are able to be answered.
